Los Angeles, California

↑ a literal BBQ get together with local bands

I think its beautiful when art and community overlap especially during hard times. It reminds us that we are not alone. Accesability is also extremly important during these community events. I chose artists and shops that showed those values. I hope this zine can be a ~~reminder~~ reminder to people in the future that we are not alone and how community is super important to the revolution.

It's important to keep record of these things because ~~America~~ America Loves to rewrite history and censor parts that make it look bad.

Here's to zines AND the revolution ♡!
